Take the **5 North** to North County, passing Del Mar, Encinitas and Leucadia.

Exit at **Palomar Airport Road, turn Right**, heading inland.

Go approximately 4 miles, you will see the helicopter pads on your left as you approach.

At the intersection of Palomar Airport Road, and **Yarrow Drive, you will make a Left turn** in to the airport.

The **road will fork** in two directions as soon as you enter the airport's main driveway, **you will veer to the right**.

The terminal you'll be departing from is located at 2210 Palomar Airport Rd. The facility is called Western Flight, and the phone number there is (760) 438-6800. An easy way to find it is to look for the air traffic control tower, Western Flight is right at the base of the tower, on the East side, just to the right of it. **You'll make a right turn in to their parking lot**, Drive up to the security gate & push the button. Tell them you are departing on a charter flight with So Cal Aviation Services.

Drive around the hangars and you'll make two lefts to the front ramp where the aircraft are. You should see the aircraft you are scheduled to depart on. You may want to have the tail number handy to find your plane easier. You can pull right up to the aircraft,, the ground crew will load you luggage and take care of your car.

If you get lost or need any further instructions you can call (877) 500-JETS 24 hours a day, 7 days a week. Have a GREAT trip!
